Re: Cross-Linked Vegetable Oil
Filter Material
Helf. 582-784, PM #605

Dear Mr. Eichelburg:

I enclose suggested additions and corrections to the draft application of November 16. These are contained in a memo from Dr. Rainer to me and in a listing which I made up from notes by the inventors; recent developments in the invention are involved. An additional example is included. On Page 2 of the memo is an insertion for Page 9, Line 17 from which I would recommend deletion of the second sentence beginning "In addition..." We will be glad to try to provide any further help you need.

Very truly yours,

G. Esler Inskeep
